Professional Summary

- QA Automation Engineer with 2+ years of experience in manual and automation testing of web applications across Agile environments.
- Skilled in developing scalable automation frameworks using Playwright, Selenium WebDriver, TestNG, and JavaScript to improve regression efficiency and software quality.
- Experienced in functional, regression, cross-browser, and API testing with strong knowledge of SDLC, STLC, defect lifecycle, and CI/CD workflows.
- Proven ability to debug issues, collaborate with cross-functional teams, and contribute to reliable end-to-end product validation for high-quality software releases.

Technical Skills

Programming Languages: JavaScript, Core Java

Manual Testing: Functional Testing, Regression Testing, Cross-Browser Testing, Exploratory Testing, UAT, End-to-End Testing

Automation Testing: Playwright, Selenium WebDriver, TestNG, Maven

Framework Concepts: Page Object Model (POM), Reusable Components, Test Case Design **Defect Trackings:** JIRA

API Testing: Postman

CI/CD & Version Control: Jenkins, Git

Experience

PerfectQA

Dec 2025 - Present

QA Engineer

Ahmedabad, Gujarat

- Developed and maintained automated regression test scripts using Playwright (JavaScript) and TestNG, improving regression efficiency and reducing repetitive manual effort.
- Designed and executed functional, regression, and cross-browser test scenarios to validate end-to-end application workflows across multiple releases
- Performed defect analysis and root cause investigation, logging and tracking issues through JIRA to support faster resolution cycles.

Otobit Pvt Ltd

May 2025 - Nov 2025

Quality Analyst

Surat, Gujarat

- Designed and executed 200+ manual and automated test cases covering functional and regression testing scenarios across multiple web applications.
- Developed Selenium WebDriver automation scripts using Java, TestNG, and Maven, significantly reducing manual regression effort.
- Identified, documented, and tracked 40+ critical defects using JIRA, contributing to improved application stability and release quality.

Projects

Biteheist | Manual & Automation | Java, Selenium, TestNG, Maven, JIRA

May 2025 - Nov 2025

- Developed and maintained automated regression suites using Playwright and Selenium for validating critical application workflows.
- Implemented Page Object Model (POM) architecture to improve framework scalability, maintainability, and code reusability.
- Designed comprehensive test scenarios and executed functional, regression, and cross-browser testing across multiple environments.

Signature Club | Manual & Automation | Manual Testing, Java, Selenium, TestNG, JIRA

Nov 2024 - Mar 2025

- Designed detailed test cases and executed functional and regression testing for multiple application modules.
- Validated UI workflows and backend functionality to ensure reliable end-to-end user experience.
- Performed defect tracking and collaborated with developers to resolve application issues efficiently.

Education

NIST University

Aug. 2019 – April 2023

Bachelor of Technology - CGPA: 7.8

Berhampur, Odisha

Extracurricular / Certifications

- Manual & Automation Testing Certification, Mind Q Systems, Hyderabad
